EDUCATION

VIT-AP University <i>B. Tech in Computer Science and Engineering (Core), CGPA: 8.38/10</i>	Amaravati Sep 2023 – Present
The Lexicon International School <i>Class 12, Grade: 74.8%</i>	Wagholi, Pune Apr 2022 – Mar 2023
The Lexicon International School <i>Class 10, Grade: 95%</i>	Wagholi, Pune Apr 2020 – Mar 2021

EXPERIENCE

Trainee Security Engineer (Intern) <i>Benelec Infotech Pvt. Ltd.</i>	May 2025 – July 2025 Pune, India
--	-------------------------------------

- Identified, analyzed, and mitigated **40+ network vulnerabilities** (e.g., TLS/SMB) across **20+ enterprise endpoints** using Nessus, CVSS, and Active Directory GPOs, reducing overall system risk by **30%**.
- Gained enterprise IT experience by auditing Synology NAS setups, deploying a TrueNAS server with **99.9% uptime**, and analyzing **15+ malware behavior patterns** through sandboxed Python/Batch simulations.

PROJECTS

Hybrid Intelligent Recruitment System [H.I.R.E.] GitHub <i>Python, Flask, Neural Network, Fuzzy Logic</i>	2026
- Developed an automated resume screening platform integrating a custom fuzzy logic engine and neural network classifier, achieving an 80% accuracy rate in candidate ranking. - Implemented advanced semantic and keyword matching algorithms, enabling systematized extraction and classification of features from batches of 100+ resumes, reducing manual screening time by 65%. - Built an end-to-end modern web UI for seamless recruiter interaction, incorporating AI explainability benchmarks to ensure transparent and bias-reduced skill verification.	
Flood Monitoring and Alert System <i>Arduino, Python, Flask, YOLOv8, HTML/CSS/JS</i>	2025
- Engineered a proactive IoT flood alert system interfacing an Arduino Uno with a Python (Flask, Socket.IO) backend via PySerial, maintaining a sub-2-second hardware-to-dashboard latency. - Integrated a YOLOv8-seg computer vision model achieving 82% confidence scores for real-time visual flood confirmation, triggering real-time AI-driven override commands. - Deployed a live HTML/CSS/JS dashboard and ThingSpeak cloud channel for persistent data logging of 500+ sensor data points daily, allowing for remote data visualization and manual control.	
Fire Fighting Rover <i>Arduino Uno, Hardware Sensors</i>	2024
- Developed an automatic fire detection and extinguishing vehicle capable of detecting flames within a 2-meter radius in under 5 seconds using an Arduino Uno and dedicated flame sensors. - Integrated a servo motor-controlled water pump to extinguish fires across a 180-degree field of view, complemented by buzzers and LEDs for immediate, localized alerts.	

TECHNICAL SKILLS

Languages: Java, Python, SQL, Batch Script
Technologies & Tools: MySQL, SQL Plus - Oracle, Visual Studio Code, Jupyter Notebook, NetBeans, Nessus Vulnerability Scanner, Synology NAS, TrueNAS, Microsoft ADDS, ThingSpeak, Arduino IDE, React.js, Firebase (Firestore/Auth), Render, OpenAI API, Terraform

AWARDS AND CERTIFICATES

Trainee Security Engineer: Benelec Infotech Pvt. Ltd.
Python Fundamentals for Beginners: Great Learning
AWS Academy Graduate: Cloud Foundations - Training Badge
AWS Academy Graduate: Cloud Architecting - Training Badge
